

Important information around logging in and safe use of a child's google classroom.

Dear Parents and Carers,

We know that in the event of closure, pupils all throughout school may well wish to access work via Google Chrome and Google Classroom. Obviously, we use Chrome and Google Classroom on a regular basis in school (more regularly, the further up the school your child is). If your child has their own device at home, then it will be important that you monitor its use and that your children follow safe internet practice as they would in school.

If you are unsure of e-safety related practice then please look at the Trust's e-safety policy which can be found under 'About us' and then 'Policies' at our Ebor Academy Trust website: www.ebor.academy.

And of course, please remember that the vast majority of social media apps and sites eg Instagram carry a recommended age of at least 12+ so using these apps or sites whilst logged into a child's Google is NOT recommended.

A WORD OF WARNING THAT ALL PARENTS/ADULTS MUST NOTE

If a child signs into their Google Chrome account on one of the adult devices in the house, then please make sure you LOG THE CHILD OUT after each use.

If you forget, and your child is still logged in, then all the searches and internet use that the adult then does will also be in your child's internet history.

On the next page of this document is a useful set of slides for logging safely in and out of chrome on a home device. This link will also provide access to the guidance: <https://sites.google.com/vitalyork.com/vitalhelp/pc-log-onto-chrome>

If your child is in KS2 and has brought a school device home, they can login to and access their chromebooks as they would in school, as long as they are connected to the internet (just like you would connect your phone to the WIFI).

For guidance on how to connect your child's chromebooks to the WIFI please follow this link: <https://support.google.com/chromebook/answer/1047420?hl=en-GB>

If you have any questions, please contact school.

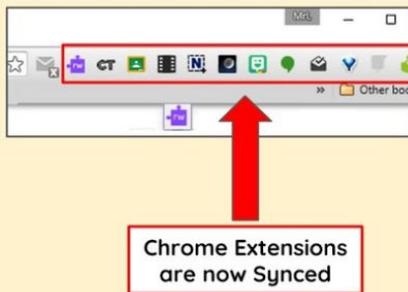

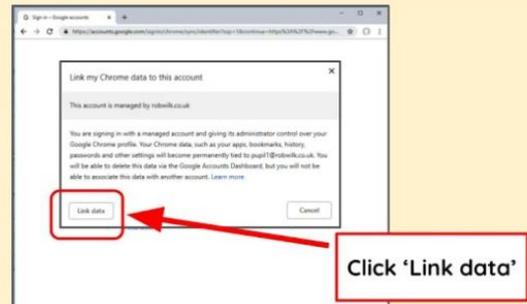

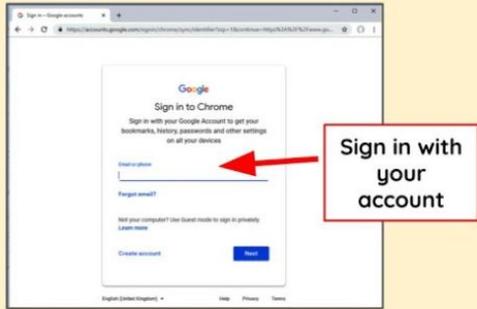

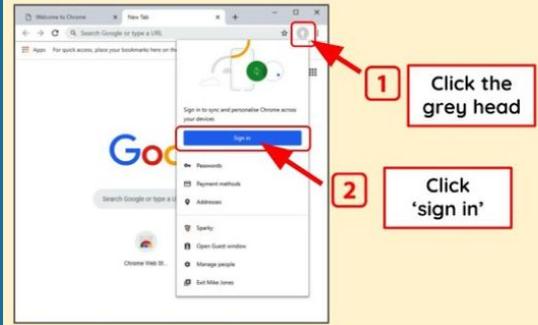

Thank you for your cooperation, we hope this is helpful.
