

The most important teacher in your child's life is you!

Have you heard of Family Learning?

If you are, or if you know someone who is:

- a parent, grandparent or carer who wants to support a child's learning, **or**
- wanting to brush up and develop your own skills in order to support your child, with the option to gain qualifications in English or maths, **or**
- volunteering or working in school or pre-school settings or is thinking about this line of work,

Family Learning courses can help you to understand how children learn, keep up to date with how English and maths are taught in schools, and learn fun activities to encourage learning at home.

For more information and to access courses. Please visit:
